

TASK-1

#I have created a “Fixed LOD” Expression i.e., calculating fixed profit for each Sub-Category regardless of region.

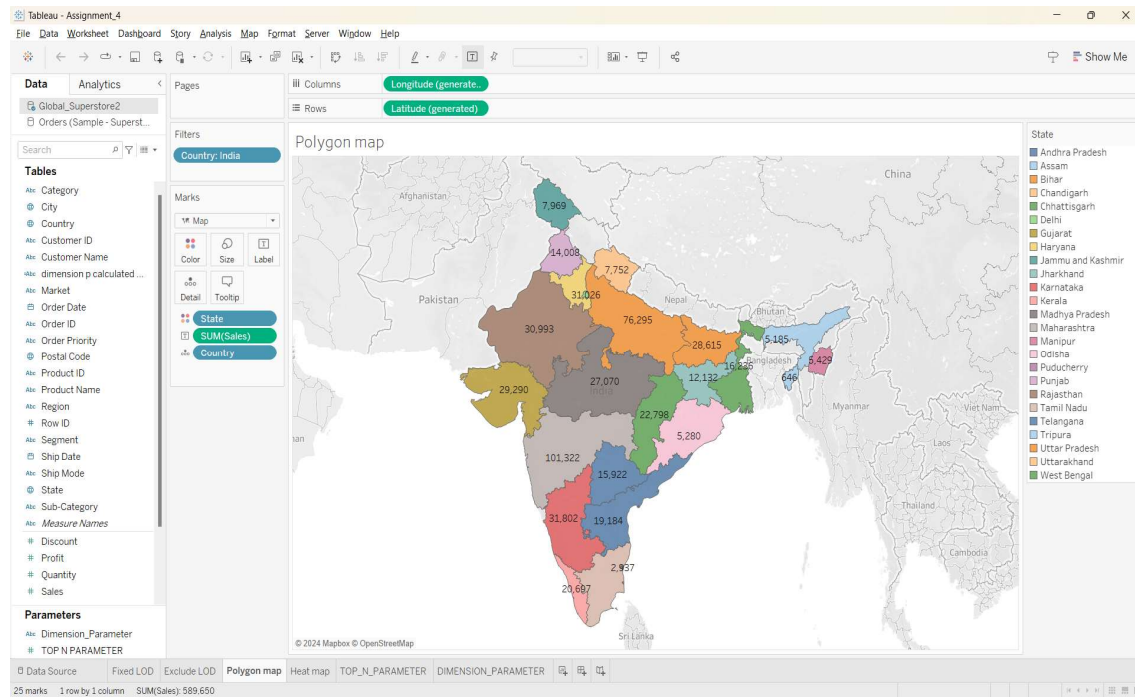

#I have created a “Exclude LOD” Expression i.e., calculating exclude profit for each Category regardless of region & segment.

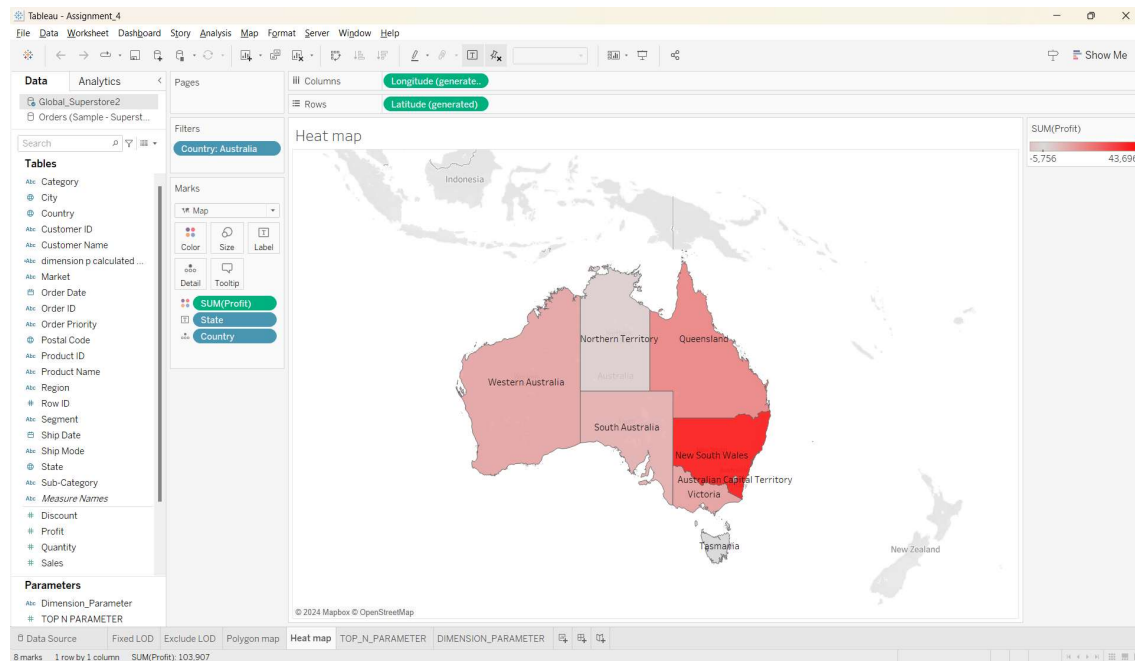

TASK-2

#I have created a 1st map visualization of type “Polygon Map” by using Geographical dimensions like country, state.

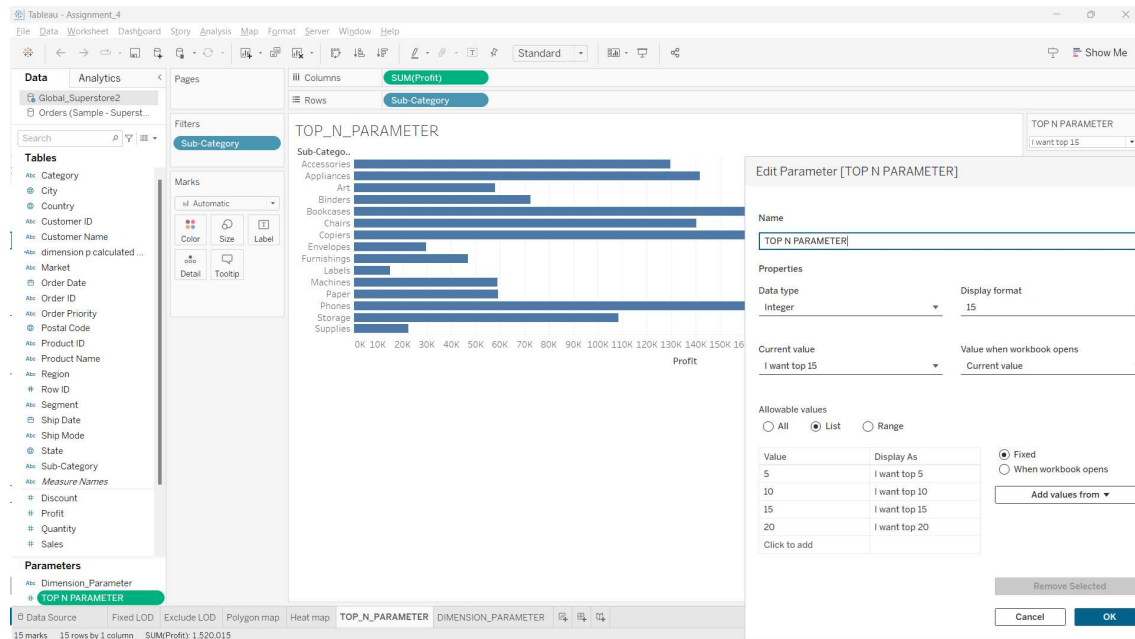

#I have created a 2nd map visualization of type “Heat Map” by using geographical dimensions like country, state.

TASK-3

#I have created a “Top N Parameter” which datatype is a integer which it shows the top 5,10,15,20 list.

I have created a “Dimension Parameter” by successful creation of dimension p calculation field which sort and displays the category, segment, sub-category.
